

Purification and Separation of Basic Compound Processed by the Yamazen's Automatic Chromatographic Method Development Software (Patent No.3423707) with use of an Amino propyl Column

(1) Correlation between TLC and Column Chromatography

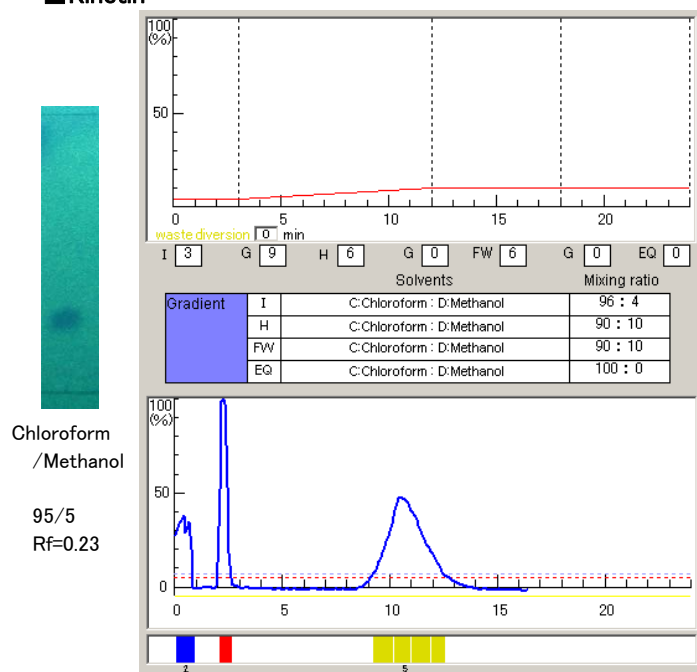

Compound

1. Chlorpheniramine Maleate	2. Nifedipine	3. Hydroxyethyl Salicylate	4. Kinetin	5. Acetoamidophenol

(2) Preparative Liquid Chromatography Performed by Yamazen's Automatic Method Development Software (Column used: Hi-Flash column L size packed with Amino propyl bonded Silica Gel)

Kinetin

Acetoamidophenol
