

The proper use of Columns will result in Highest Column Performance.

Yamazen Inject Column + Yamazen Universal Column

Inject column used together with Universal column will maximize the advantage of concentrating the sample band with gradient method.

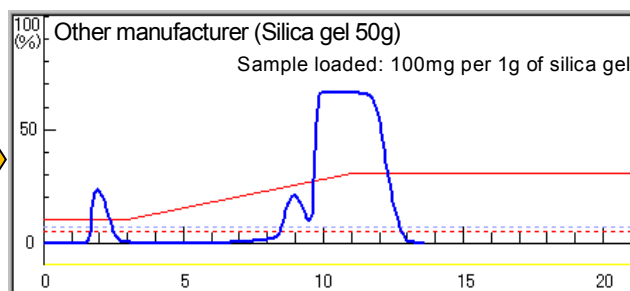

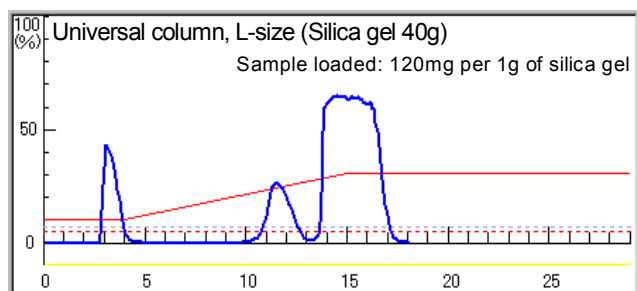

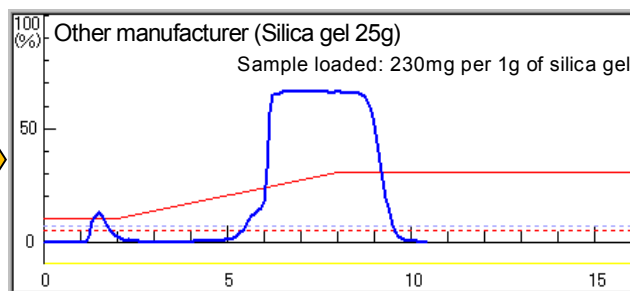

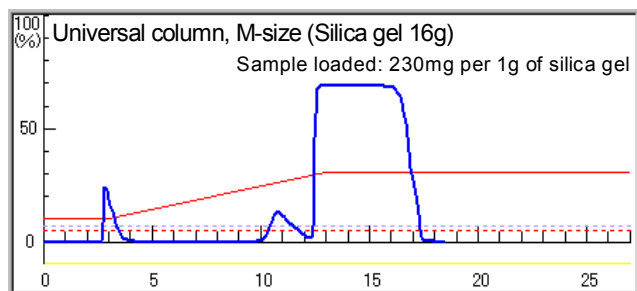

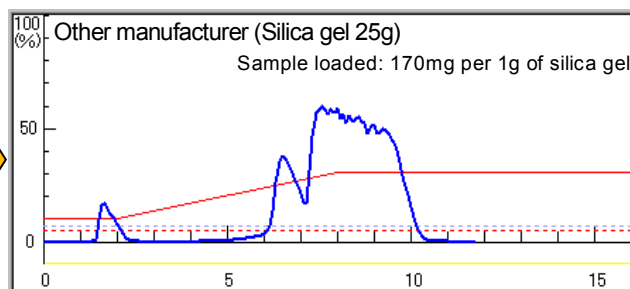

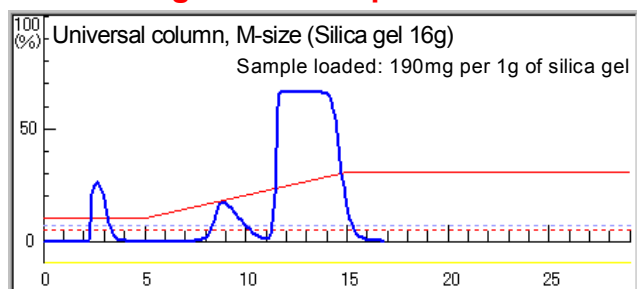

Yamazen Inject column used with other manufacturers' separation column will cause diffusion of the sample band.

When used together, Yamazen Inject column and Yamazen Universal column will result in the highest column performance.

Yamazen Inject column is used with other manufacturer's separation column.

Sample: Dimethyl phthalate/Diethyl phthalate
